

### **Nursery goes Dynamic!**

Nursery visited Dynamic Earth last week as part of our 'Planet Earth' topic. We had a wonderful day finding out about dinosaurs, the Ice Age, rainforests and space! We even got to touch a real iceberg and experience a volcanic eruption where the floor actually shook – thank goodness we were sitting down as we wobbled like jellies!

It was a great day out and we learned so much about our planet! We have also been invaded by aliens so please pop by and see our made up monsters! It's been a fairly scientific week as we also had a visit from Generation Science and learned all about vibrations and sound waves with a story about Ella's Wobble! We made three different instruments ourselves and then played together as a band. We loved experimenting with echoes too!
